ABOUT ME

I am an individual that likes to be challenged and to challenge myself, I like to try and test my abilities to solve problems whether they be in my field of work or not. The love of problem solving is what got me to be interested in technology because of how much technology has simplified most peoples lives. And that is the reason I chose a career path in Software development, because of how much Software has made our lives simple and it would be a great feeling to work in a space where I am impacting peoples lives positively.

EXPERIENCE

Software Developer Intern

BBD - Vodacom

📅 February 2018 - May 2018 📍 Killarney, SA

- During my first internship with BBD I was sent to work for Vodacom which is 1 of the major ISP's in SA and 1 of BBD's clients. I worked on an app that was being used by Vodacom walk-in stores to help reduce the time clients have to wait for a consultant to be available as they could use the self-service portal app that the team I belonged to had built. My role was to develop the screens using ReactJS.

Software Developer

BBD - Vodacom

📅 Feb 2019 - Current 📍 Killarney, SA

- Upon my return to Vodacom, I was moved to a different team that worked on the consumer Vodacom app that's available on the App and Google play stores. The main purpose of the app is to make sure that customers have access to most vodacom services that they previously had to call customer service or go directly to the stores for at their fingertips from the comfort of wherever they are.
- My role as a front-end developer on the team is to bring the UI/UX designs to life by coding them in React Native for cross-platform accessibility.
- Tools I use include Bitbucket, Javascript, Jira, Git, Android Studio, VS Code, Expo, Xcode.

EDUCATION

National Senior Certificate

Task Academy

📅 Class of 2009 📍 Pageview, SA

- 7 Subjects
- 1 Distinction

MICT SETA NQF Level 5(Software Development)

WeThinkCode_

📅 May 2017 - Feb 2019 📍 JHB, SA

LIFE PHILOSOPHY

"For the things we learn before we can do. We learn by doing."

MOST PROUD OF

Being a risk taker

With great risks comes great reward and that understanding is the reason I take risks

Persistence

The ability to stick it out even when stuff becomes unpleasant and difficult.

My willingness to try

Never letting the fear of failure get in my way of trying new things

My family & friends

I always put the people in my life first

SKILLS

Programming

Programming technologies I have used

Vim Git JavaScript ReactJS
React-Native Node.JS HTML/CSS
JSON UNIX

Personal skills

What are some useful skill I have

Time Management Teamwork
Creativity Adaptability
Self-motivation Communication
Ability to Work Under Pressure
Listening Critical thinking
Problem solving
